SUBJECT INDEX

Book Reviews

An Introduction to Planetary Physics 139
Géométrie Différentielle et Systèmes Extérieurs 141
Violent Universe 231
Physik der festen Erde 331
Spherical and Practical Astronomy as applied to Geodesy 331
Theory of Probability 231
Correlation of Infrared and Roman Spectra of Organic Compounds 231
A Coastal Pond 232

Earth tides

Earth tides recorded by the 55-m Cambridge laser, interferometer, *G. C. P. King & V. B. Gerard* 437

Free oscillations

The normal modes of a rotating, elliptical Earth—II. Near reasonance multiplet coupling, *F. A. Dahlen* 397

Geodesy

Accuracy of geoid heights from modified Stokes kernels, *L. Wong & R. Gore* 81
General solution of the problem of hydrostatic equilibrium of the Earth, *Mohammad Asadullah Khan* 177
The free air geoid for Australia, *R. S. Mather* 499

Geomagnetism

Computation of the magnetic anomalies caused by two-dimensional bodies, *M. H. P. Bott* 251
Daily variation and secular variation of the geomagnetic field from shipboard observations in the Gulf of Aden, *R. B. Whitmarsh & M. T. Jones* 477

Heat flow

Analysis of heat flow data—I. Detailed observations in a single borehole, *A. E. Beck & A. S. Judge* 145

PAGE

Letters to the Editors

Distance corrections for deep focus earthquakes, *R. D. Adams & M. J. Randall* 329

Magnetic properties of rocks

Opaque petrology and the stability of natural remanent magnetism in basaltic rocks, *J. M. Ade-Hall* 93
The temperature dependent cation distribution in titanomagnetites, *A. Stephenson* .. 199
Investigations into the stable remanent magnetization of sediments, *D. W. Collinson* .. 211
Opaque petrology and natural polarity in Mull (Scotland) dykes, *J. M. Ade-Hall & R. L. Wilson* 333
On the oxidation and reduction of natural magnetities, *Rudolf Pucher* 489

Oceanic structure

Crustal structure and origin of Peake and Freen Deeps, NE Atlantic, *D. H. Matthews, A. S. Laughton, D. T. Pugh, E. J. W. Jones, J. Sunderland, M. Takin & M. Bacon* .. 517

Oceonography

Some consequences of an inertia of turbulence in a tidal estuary, *B. Johns* 65

Palaeomagnetism

Magnetic anomalies and tectonics of the Cayman Trough, *D. I. Gough & J. R. Heirtzler* 33
Notes on progress in geophysics palaeomagnetic directions and pole positions—X, *M. W. McElhinny* 305
On the polar-wander path for Australia during the Cenozoic, *P. Wellman, M. W. McElhinny & Ian McDougall* 371

Planetary physics

The Martian grid system, continental blocks and continental drift, *R. A. Wells* .. 109
Stability of planetary interiors, *G. Schubert, D. L. Turcotte & E. R. Oxburgh* 441

Radioactive dating

Diffusion measurements and potassium- argon method of dating, *A. E. Mussett* .. 257

Research Notes

A note of the ground particle motion of near earthquakes, *G. Payo & M. Prensa* .. 129
How necessary are large-scale seismic refraction experiments? *T. J. G. Francis* 223
Comment on ' How necessary are large-scale refraction experiments? ' *P. L. Willmore* 227
Earth tides recorded by the 55-m Cambridge laser interferometer, *G. C. P. King & V. B. Gerard* 437

Seismology

Seismic travel-time residuals and plates, *D. Davies & D. P. McKenzie* 51
Compressibility-pressure gradient and the constitution of the Earth's outer core, *K. E. Bullen* 73
A note of the ground particle motion of near earthquakes, *G. Payo & M. Prensa* .. 129
A study of effects of the Yellowknife crustal structure upon the *P* coda of teleseismic events, *H. S. Hasegawa* 159
Crustal phase velocities observed at the Eskdalemuir seismic array 189
How necessary are large-scale seismic refraction experiments? *T. J. G. Francis* 223
Comment on ' How necessary are large-scale seismic refraction experiments? ' *P. L. Willmore* 227
A quantitative evaluation of seismic signals at teleseismic distances—I. Radiation from point sources, *J. A. Hudson* 233
Distance corrections for deep focus earthquakes, *R. D. Adams & M. J. Randall* .. 329
A quantitative evaluation of seismic signals at teleseismic distances—II. Body waves and surface waves from an extended source, *J. A. Hudson* 353
The normal modes of a rotating, elliptical Earth—II. Near-reasonance multiplet coupling, *F. A. Dahlen* 397
Earth tides recorded by the 55-m Cambridge laser interferometer, *G. C. P. King & V. B. Gerard* 437
Calibration of the Yellowknife seismic array with first zone explosions, *D. H. Weichert & K. Whitham* 461

Tectonics

Speculations on the consequences and causes of plate motions, *D. P. McKenzie* 1
Magnetic anomalies and tectonics of the Cayman Trough, *D. I. Gough & J. R. Heirtzler* 33
Seismic travel-time residuals and plates, *D. Davies & D. P. McKenzie* 51
